IN THE CLAIMS

1. (Previously Presented) An electronic device comprising:
 - a base having a first surface;
 - a substantially transparent removable faceplate coupled to the base and covering substantially all of the first surface; and
 - a replaceable ornamental insert positionable between the removable faceplate and the first surface of the base such that a portion of the ornamental insert is viewable through the substantially transparent section, said ornamental insert punched out of a sheet of paper after a user of the electronic device has printed an ornamental design thereon.
2. (Original) The electronic device of claim 1 wherein the replaceable ornamental insert has an upper surface having an ornamental design printed thereon and the ornamental design is viewable through the substantially transparent section of the faceplate.
3. (Original) The electronic device of claim 1 wherein the base is a base portion of a portable phone.
4. (Original) The electronic device of claim 3 wherein the replaceable ornamental insert has an upper surface having an ornamental design printed thereon and the ornamental design is viewable through the substantially transparent section of the faceplate.
5. (Original) The electronic device of claim 1 wherein:
 - the base is a base portion of a computer; and
 - the replaceable ornamental insert is located between the removable faceplate and the first surface of the base such that a portion of the ornamental insert is viewable through the substantially transparent section when the removable faceplate is affixed to the base.
6. (Original) The electronic device of claim 5 wherein the replaceable ornamental insert has an upper surface having an ornamental design printed thereon and the ornamental design is viewable through the substantially transparent section of the faceplate.

7. (Original) The electronic device of claim 1 wherein the base is a base portion of a digital game player.

8. (Original) The electronic device of claim 7 wherein the replaceable ornamental insert has an upper surface having an ornamental design printed thereon and the ornamental design is viewable through the substantially transparent section of the faceplate.

Claims 9-10 (Canceled).

11. (Currently Amended) A digital audio player comprising:
a base with a first surface, the first surface to include an electronic display;
a substantially transparent removable faceplate coupled to the base and covering
substantially all of the first surface; and
a replaceable ornamental insert positionable between the removable faceplate and
the first surface of the base. The digital audio player as in claim 10 wherein the first surface
includes an electronic display and the replaceable ornamental insert includes a display aperture,
an upper surface of the replaceable insert having an ornamental design printed thereon, a portion
of the ornamental design viewable through the substantially transparent section of the faceplate.

12. (Original) A method comprising:
manufacturing an electronic device with a base having a first surface
manufactured to accept an ornamental insert thereon;
manufacturing a substantially transparent removable faceplate to couple to the
base and to cover substantially all of the first surface;
manufacturing a replaceable ornamental insert positionable between the
removable faceplate and the first surface of the base; and
positioning the insert between the base and faceplate and coupling the faceplate to
the base.

13. (Original) The method of claim 12 wherein manufacturing the electronic device
includes manufacturing a digital audio player.

14. (Original) The method of claim 12 wherein manufacturing the electronic device includes manufacturing a digital game player.

15. (Original) The method of claim 12 wherein manufacturing the electronic device includes manufacturing a portable phone.

16. (Original) The method of claim 12 wherein manufacturing the electronic device includes manufacturing a computer.

17. (Original) An electronic device comprising:
a base having an upper surface;
an ornamental insert covering a portion of the upper surface; and
a faceplate coupled to the base and the faceplate covering all of the upper surface of the base and the faceplate having a substantially transparent section.

18. (Original) The electronic device as in claim 17 wherein the faceplate is substantially transparent.

19. (Original) The electronic device as in claim 18 wherein the ornamental insert covers substantially all of the upper surface.

20. (Original) The electronic device as in claim 18 wherein the base is a portion of a digital audio player.

21. (Previously Presented) The electronic device as in claim 18 wherein the base is a portion of a notebook computer.
